This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A composition comprising <a href="https://linear.com/linear

Claim 2 (currently amended): A composition as claimed in claim 1, wherein said <u>lipopolysaccharide-stimulated</u>, transduced, spleen-derived, myeloid committed stem cells <u>obtained from spleen</u> contain an exogenous nucleic acid encoding a beneficial myeloid specific protein selected from the group consisting of glucocerebrosidase, hexosaminidase A, iduronate-2-sulphatase, sphingomyelinase and arylsulfatase A.

Claim 3 (original): A composition as claimed in claim 2 wherein said exogenous nucleic acid is operably linked to a myeloid specific promoter.

Claims 4-6 (canceled).

Claim 7 (previously presented): A method for expressing exogenous nucleic acids in myeloid-committed stem cells comprising:

a) obtaining myeloid-committed stem cells from spleen; and

b) contacting said cells with a retroviral vector containing at least one nucleic acid encoding a myeloid specific protein, under conditions whereby said vector enters cells and expresses a protein encoded by said at least one nucleic acid.

Claim 8 (original): A method as claimed in claim 7, wherein said at least one nucleic acid encoding a myeloid specific protein is operably linked to a myeloid cell specific promoter.

Claims 9-19 (canceled).
